# Welcome to the MIC Conference 2023!

Dear Friends,

A warm welcome to the MIC Conference 2023, our annual event dedicated to the forefront of creativity studies! This year's edition promises to be a unique and remarkable experience, building upon the success of our previous gatherings.

Our conference theme, "Creative Cross-Pollinations," unifies and diversifies the field of creativity studies, showcasing the richness and depth of this dynamic area. As we delve into the multiple dimensions of creativity, we aim to provide a platform for dialogue, mutual acquaintances, and the generation of new collaborations!

We are proud to present you with a very compelling conference program, featuring renowned keynote speakers, scientific sessions on hot topics, thematic symposia for going deep into critical issues, lots of room for young researchers presentations, as well as a rich social program to enjoy the beautiful city of Trieste.

In line with our commitment to providing a diverse and enriching experience, we are hosting the Second General Assembly of ISSCI, the International Society for the Study of Creativity and Innovation, on September 12. This collaboration fosters a sense of community and enhances the exchange of ideas among scholars and practitioners in the field.

We extend our heartfelt gratitude to the organizing institutions and sponsors who have shown unwavering support for this event. Starting with the hosting institution, the University of Trieste, the organizer Fondazione Guglielmo Marconi, and then in alphabetical order: BIC Foundation, Healthcare (MPDI), ISSCI, Journal of Intelligence (MPDI), University of Bologna. You have all played instrumental roles in making this conference a reality.

Most importantly, we want to express our deepest appreciation to all speakers and participants, whether attending in person or joining us online. Your passion and enthusiasm for this exciting field of research bring life into this event. You are the heart of our conference, and we are honored to have you with us.

Please enjoy the Conference, and fearlessly embark on this captivating journey of Creative Cross-Pollinations: let the dance of surprising ideas begin!
